SUMMARY

Junior Software Developer with hands-on experience building full-stack web applications using React, Node.js, Express.js, MongoDB, Laravel, and React Native. Developed a production CRM system adopted by 10+ employees and independently led development during my internship. Strong foundation in REST API development, database design, authentication systems, and modern JavaScript development.

SKILLS

- **Languages:** JavaScript, TypeScript, PHP, HTML5, CSS3
- **Technologies & Frameworks:** React, React Native, Node.js, Express.js, Laravel, Tailwind CSS, Bootstrap
- **Backend Technologies:** REST APIs, JWT Authentication, WebSockets
- **Databases & Services:** MongoDB, MySQL, SQLite, Redis, Firebase
- **Tools:** Git, GitHub, Postman, Figma

EXPERIENCE

Software Developer Quezon City, Philippines
IntelliSeven Technology Solutions Inc. Feb 2026 – May 2026

- Completed a software development internship and developed IntelliCRM, a full-stack CRM web application using React, Node.js, Express.js, and MongoDB to streamline customer management and sales operations.
- Independently led development as the sole programmer after the initial collaboration phase, owning frontend and backend implementation.
- Collaborated with the team to deliver new features and maintain the production system.
- Delivered a production-ready CRM platform adopted by 20+ employees, improving customer tracking and internal sales workflows.

Software Developer (Contract Project) Albay, Philippines
ASG Platforms January 2025 – April 2025

- Developed web applications and backend systems using React, Tailwind CSS, Node.js, Express.js, and Firebase.
- Built frontend interfaces and backend services for internal application projects, including authentication, Firestore database integration, and API development.
- Designed and implemented a Redis-inspired in-memory database in Node.js, featuring custom data structures, persistence mechanisms, and optimized backend operations.
- Participated in technical demos, incorporated engineering feedback, and delivered working software solutions within project timelines.

FEATURED PROJECT

IntelliCRM - Customer Relationship Management System February 2026 – May 2026
React.js • Node.js • Express.js • MongoDB • REST API

- Designed and integrated RESTful APIs between the React frontend and Node/Express backend.
- Implemented JWT authentication and role-based access control for secure user access.
- Integrated WebSocket-powered real-time notifications and live activity updates.
- Designed MongoDB data models and built dashboards, analytics, and reporting modules.
- Built a scalable architecture supporting day-to-day operations for more than 10 employees.

ChronoLock - Laboratory Access Control & Attendance Monitoring System June 2024 – December 2025
React Native • Node.js • MySQL • REST API (https://github.com/MarkVincent06/ChronoLock_Mobile)

- Built a cross-platform mobile application for laboratory access control, attendance monitoring, and smart door lock integration.
- Designed and integrated RESTful APIs between the React Native mobile application and backend services.
- Implemented secure authentication, attendance tracking, and seat management for over 300 laboratory users.

Redish-Store - Redis-inspired In-Memory Database March 2025 – April 2025
JavaScript • Node.js • Redis Concepts (<https://github.com/MarkVincent06/redish-store>)

- Built a Redis-inspired in-memory database supporting strings, lists, hashes, sets, JSON, Streams, and Geospatial data structures.
- Implemented persistence mechanisms including append-only file (AOF) logging and snapshot-based storage.
- Developed Pub/Sub messaging, transaction processing, indexing, and optimized in-memory data operations.

EDUCATION

Camarines Sur Polytechnic Colleges (CSPC) Camarines Sur, Philippines
Bachelor of Science in Information Technology January 2021 - July 2026
